### Directions for Use with Sprinkler Container

Mix and dissolve 4 ounces Raspberry Food in each gallon of water to be applied. Fertilizer once in early spring as directed below.

**For Red Raspberries:** Evenly apply 1 gallon of solution in a band 10-14 inches wide, 20 feet along each side of the hedge row. Apply so that bands nearly touch over the planting line. To determine how fast you should walk when fertilizing, make a trial run using 1 gallon of plain water in the manner described.

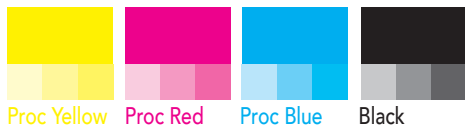

**For Black and Purple Raspberries:** Sprinkle approximately 1/3 gallon in a 10-inch band around each planting clump.  
For best results use every 7-14 days.
